PETITION TO THE WEST VIRGINIA LEGISLATURE

In recent years, patient access to quality health care has declined as more and more physicians leave West Virginia. The skyrocketing cost of professional insurance and shortcomings in the current medical liability system have created a major crisis. Last year alone, five percent of West Virginia's doctors left the state and the exodus appears to be accelerating. Unless this trend is reversed, the people of West Virginia will suffer irreversible adverse consequences as communities lose their family physicians and difficult-to-replace specialists.

Accordingly, we the people petition our elected representatives in the West Virginia Legislature to take swift and decisive action to reform the medical liability system and promote access to quality health care for the people of West Virginia.
